One source, many forms · A digital-humanities reading of Journey to the West

Open source · dual licence
MIT + CC BY-NC 4.0

Read *Journey to the West* — with a map this time

100 chapters, **615 essays** on chapters and themes, **87 explorable visualisations**, **133 data dimensions** — not another book you cannot finish, but a map you can look up, cite and reproduce.

615 essays	**87** visualisations
133 dimensions	**34** analysis scripts

Read it all all 100 chapters

Every one of the 100 chapters is covered, alongside 500+ essays on characters, themes, culture, poetry and personal readings. Looking for one chapter? It is one click away.

100 chapters · 44 essays · 215 character studies · 209 theme essays · 34 culture essays · 13 poems

See it 133 dimensions

Character networks, an 81-trial emotion heatmap, the pilgrimage route, a danmaku museum, conversations with famous readers — the story is no longer only text; it is a set of pages you can click.

Drawn with D3.js / Three.js · produced by 34 analysis pipelines · embedded data fallback, so file:// works too

Take it no friction

No sign-up, no login, no network: clone the repo and double-click. Or install the desktop app and read offline — installers for three platforms, with auto-updates.

Windows · macOS · Linux installers · pure static, opens from file:// · the desktop app bundles the whole site offline

Open it and read — no sign-up

The online site covers all 100 chapters, the character studies, the topic essays and every visualisation; the desktop app keeps the whole site on your machine.

Code & scripts MIT · text content CC BY-NC 4.0 (attribution, non-commercial) · cite via CITATION.cff

For researchers and institutions: four hard assets

Citable · Verifiable · Reproducible · Reviewable — each one points at a path you can open, not a slogan.

Citable

A formal citation format, an academic bibliography, and a 500-year history of interpretation. You never have to cite a site because someone said it was good.

`CITATION.cff` (BibTeX / APA / Chicago) · academic paper index · criticism history (9 critics · 500 years of interpretation · three teachings · inner alchemy)

Verifiable

Every quoted line is matched character-by-character against the full text; an unmatched quote blocks the commit. An AI cannot invent a quote here, and the gates do not let it through.

Hard quote verification + **49** automated gates · per-file provenance (source / model / date / verification) · the gates guarantee fidelity, not judgement: they prove nothing was invented, not that it is worth reading

Reproducible

All analysis scripts and datasets are open, so anyone can re-run them. Every artefact on the site derives from a single source of truth and can be compared byte by byte.

`scripts/` 34 analysis classes (A – AH) · `dataset/` and `scripts/output/data/` · one-directional: source → artefact

Reviewable

AI agents draft under document skeletons, term rules and track labels; a human editor reviews every file before it lands. The division of labour is written down, not hidden.

Five tracks (general / academic / teaching / personal / cross-disciplinary) · per-file provenance and verification status · final responsibility stays with the editor

Contents · eight collections

01 **Chapters** — Original text + deep readings + notes

02 **Characters** — Protagonists · Guanyin · monster lineages · women

03 **Themes** — Heaven · 81 trials · the true and false Monkey King

04 **Culture** — Composition history · Buddhism & Taoism · Ming allegory · editions

05 **Poetry** — Poems and couplets from the original

06 **Essays** — 44 personal readings from a modern angle

07 **Method** — Decision models · role thinking · metacognitive maps

08 **Visualisations** — 87 interactive pages in D3 / Three.js

Online site

Nothing to install — open and read. The homepage reaches any chapter, character, topic or visualisation.

`https://1273984347.github.io/xiyouji/`

Desktop download

Installers for Windows, macOS and Linux; it checks for updates on launch and reads everything offline.
